FOR IMMEDIATE RELEASE

January 6, 2015

MSS PUBLISHES TWO NEW STANDARDS:
PTFE V-RING PACKING SETS FOR WATERWORKS VALVES, AND
FOR VALVES USED IN HYDROGEN PEROXIDE SERVICE

Vienna, VA – The Manufacturers Standardization Society (MSS) is pleased to announce the following NEW standards that were published December 2015:

- **MSS SP-149-2015, Preformed Elastomeric and Polytetrafluoroethylene (PTFE) V-Ring Packing Sets for Waterworks Valves**

  **Summary:** This Standard Practice establishes material, surface finish, dimensional, and testing requirements for preformed V-ring packing sets, packing chambers, and valve stems. This new Standard Practice applies to homogeneous elastomeric and PTFE V-ring packing for gray iron and ductile iron quarter-turn and multi-turn valves for waterworks applications with a maximum service temperature of 150 °F (66 °C).

- **MSS SP-150-2015, Valves for Use in Hydrogen Peroxide Service**

  **Summary:** The purpose of this Standard Practice is to provide requirements for material, design, fabrication, pressure testing, marking, and preparation for shipment of valves for use in hydrogen peroxide (H₂O₂) service.

About MSS
The Manufacturers Standardization Society (MSS) of the Valve and Fittings Industry is a non-profit technical association organized for development and improvement of industry, national and international codes and standards for Valves, Valve Actuators, Valve Modifications, Pipe Fittings, Flanges, Pipe Hangers and Supports, and Associated Seals. Since its establishment in 1924, MSS has been dedicated to developing standards for national and global application, in cooperation with other standardizing bodies and regulatory authorities.

**MSS is an American National Standards Institute (ANSI)-accredited standards developer.**
