MSS PUBLISHES NEW STANDARD
FOR PRESSURE TESTING OF KNIFE GATE VALVES

Vienna, VA – The Manufactures Standardization Society (MSS) is pleased to announce the following NEW standard:

- **MSS SP-151-2016, Pressure Testing of Knife Gate Valves**

  **Summary:** This Standard Practice establishes requirements and acceptance criteria for shell and seat closure pressure testing of resilient, non-metallic (e.g. ceramic), and metal-to-metal seated knife gate valves of all types. The new SP-151 was developed for the purpose of providing a uniform means of testing knife gate valves commonly used in the "full open" and "full closed" type of service for isolation. This Standard Practice is not intended for use with control valves.

About MSS

The Manufacturers Standardization Society (MSS) of the Valve and Fittings Industry is a non-profit technical association organized for development and improvement of industry, national and international codes and standards for Valves, Valve Actuators, Valve Modifications, Pipe Fittings, Flanges, Pipe Hangers and Supports, and Associated Seals. Since its establishment in 1924, MSS has been dedicated to developing standards for national and global application, in cooperation with other standardizing bodies and regulatory authorities.

**MSS is an American National Standards Institute (ANSI)-accredited standards developer.**

For media inquiries, please contact MSS Executive Director, Robert O’Neill at (703) 281-6613 or boneill@msshq.org.
