MSS PUBLISHES REVISED STANDARD FOR PRESSURE FITTINGS

Vienna, VA – The Manufacturers Standardization Society (MSS) of the Valve and Fittings Industry announces that technical standard SP-109-2018, *Weld-Fabricated, Copper Solder-Joint Pressure Fittings* has been revised and published by MSS.

MSS SP-109 provides the industry with a standard for factory-made, weld-fabricated, copper pressure fittings in nominal sizes 1/4 through 12 and that conforms to ASME B16.22, except where modification is required. The focus of the standard includes pressure-temperature ratings, abbreviations for end connections, size and method of designating openings of fittings, marking, material, weld specifications, laying lengths, inspection tolerance, alignment, tests, and gauging.

The revised MSS standard practice, SP-109-2018, is now available. It has been published as an electronic versions (PDF) and in book format, available from authorized U.S. and global distributors.

The original edition of SP-109 was published by MSS in 1991. It was developed and continues to be maintained under the consensus of MSS Technical Committee 201, *Non-Ferrous Fittings and Flanges*.

About MSS
The *Manufacturers Standardization Society of the Valve and Fittings Industry* is a non-profit technical association organized for development and improvement of industry, national and international codes and standards for Valves, Valve Actuators, Valve Modifications, Pipe Fittings, Flanges, Pipe Hangers and Supports, and Associated Seals. Since its establishment in 1924, MSS has been dedicated to developing standards for national and global application, in cooperation with other standardizing bodies and regulatory authorities.

MSS is an American National Standards Institute (ANSI)-accredited standards developer.
