FOR IMMEDIATE RELEASE

September 17, 2018

MSS PUBLISHES REVISED AMERICAN NATIONAL STANDARD
FOR PIPE HANGERS AND SUPPORTS

Originally published in 1959, this revised American National Standards Institute (ANSI)-approved Standard Practice incorporates the content of the original SP-58, along with the final editions of SP-69, SP-77, SP-89, and SP-90 in order to maintain a single-source document that enables the user to specify a minimum level of acceptance of pipe hangers and support design and performance, in addition to defining the types of hangers and supports. This revised edition includes many new inclusions and updated information. The 2009 edition of SP-58 was originally ANSI-approved and published in 2011.

This Standard Practice was developed by a cooperative effort of representatives of pipe hanger manufacturers. In addition, this Standard Practice was balloted and approved by an ANSI/MSS Consensus Committee (users, suppliers, others) and by ANSI itself as a revised American National Standard. It is based on current “best practice” and on the collective experience of the industry.

ANSI/MSS SP-58-2018 is now available in electronic (PDF) and in book format, available from authorized distributors worldwide. A complete list of distributors is available at: http://msshq.org/Store/orderinfo.cfm. There is also a companion Standard Practice, MSS SP-127, which relates to the design, selection, and application of bracing for piping systems subject to seismic, wind, and dynamic loading.

About MSS
The Manufacturers Standardization Society of the Valve and Fittings Industry is a non-profit technical association organized for development and improvement of industry, national and international codes and standards for Valves, Valve Actuators, Valve Modifications, Pipe Fittings, Flanges, Pipe Hangers and Supports, and Associated Seals. Since its establishment in 1924, MSS has been dedicated to developing standards for national and global application, in cooperation with other standardizing bodies and regulatory authorities.

MSS is an American National Standards Institute (ANSI)-accredited standards developer.
