MSS PUBLISHES REVISED STANDARD FOR PTFE V-RING PACKING SETS FOR WATERWORKS VALVES

Vienna, VA – The Manufacturers Standardization Society (MSS) of the Valve and Fittings Industry announces that Standard Practice SP-149-2018, Preformed Elastomeric and Polytetrafluoroethylene (PTFE) V-Ring Packing Sets for Waterworks Valves has been revised and published by MSS.

MSS SP-149 covers material, surface finish, dimensional, and testing requirements for preformed V-ring packing sets, packing chambers, and valve stems. In addition, this Standard Practice applies to homogeneous elastomeric and PTFE V-ring packing for gray iron and ductile iron quarter-turn and multi-turn valves for waterworks applications with a maximum service temperature of 150 °F (66 °C). SP-149 continues to be maintained under the consensus of Technical Committee 308, Packings & Gaskets.

The revised MSS Standard Practice, SP-149-2018, is now available from authorized U.S. and global distributors, published in an electronic version (PDF) and in book format.

About MSS
The Manufacturers Standardization Society of the Valve and Fittings Industry is a non-profit technical association organized for development and improvement of industry, national and international codes and standards for Valves, Valve Actuators, Valve Modifications, Pipe Fittings, Flanges, Pipe Hangers and Supports, and Associated Seals. Since its establishment in 1924, MSS has been dedicated to developing standards for national and global application, in cooperation with other standardizing bodies and regulatory authorities.

MSS is an American National Standards Institute (ANSI)-accredited standards developer.
