FOR IMMEDIATE RELEASE

January 20, 2017

MSS PUBLISHES REVISED QUALITY STANDARD FOR VALVES AND FITTINGS INTENDED FOR SILICONE-FREE SERVICE

Vienna, VA – The Manufacturers Standardization Society (MSS) is pleased to announce the publication of the following revised Standard Practice:

- **MSS SP-140-2017, *Quality Standard Practice for Preparation of Valves and Fittings for Silicone-Free Service***

Summary: The first edition of MSS SP-140 was published in 2011. Specific requirements include cleaning, assembly and testing of valves, inspection and acceptance, packaging, and marking. This Standard Practice is intended for applications such as painting systems which are sensitive to silicone contamination and for other services requiring an increased level of cleanliness above that of standard industrial valves and fittings.

All Standard Practices are available from MSS and through authorized distributors. A listing of official distributors is available at: <http://msshq.org/Store/orderinfo.cfm>.

Listing of all current MSS Standards: <http://msshq.org/Store/PriceList.cfm>

About MSS

The Manufacturers Standardization Society (MSS) of the Valve and Fittings Industry is a non-profit technical association organized for development and improvement of industry, national and international codes and standards for Valves, Valve Actuators, Valve Modifications, Pipe Fittings, Flanges, Pipe Hangers and Supports, and Associated Seals. Since its establishment in 1924, MSS has been dedicated to developing standards for national and global application, in cooperation with other standardizing bodies and regulatory authorities.

MSS is an American National Standards Institute (ANSI)-accredited standards developer.

For media inquiries, please contact MSS Executive Director, Robert O'Neill at (703) 281-6613 or boneill@msshq.org.
