Fabricated Tapping Sleeves
This MSS Standard Practice was developed under the consensus of the MSS Technical Committee 112 and the MSS Coordinating Committee. The content of this Standard Practice is the resulting efforts of competent and experienced volunteers to provide an effective, clear, and non-exclusive standard that will benefit the industry as a whole. This MSS Standard Practice describes minimal requirements and is intended as a basis for common practice by the manufacturer, the user, and the general public. The existence of an MSS Standard Practice does not in itself preclude the manufacture, sale, or use of products not conforming to the Standard Practice. Mandatory conformance to this Standard Practice is established only by reference in other documents such as a code, specification, sales contract, or public law, as applicable. MSS has no power, nor does it undertake, to enforce or certify compliance with this document. Any certification or other statement of compliance with the requirements of this Standard Practice shall not be attributable to MSS and is solely the responsibility of the certifier or maker of the statement.

“Unless indicated otherwise within this MSS Standard Practice, other standards documents referenced to herein are identified by the date of issue that was applicable to this Standard Practice at the date of approval of this MSS Standard Practice (see Annex A). This Standard Practice shall remain silent on the validity of those other standards of prior or subsequent dates of issue even though applicable provisions may not have changed.”

By publication of this Standard Practice, no position is taken with respect to the validity of any potential claim(s) or of any patent rights in connection therewith. MSS shall not be held responsible for identifying any patent rights. Users are expressly advised that determination of patent rights and the risk of infringement of such rights are entirely their responsibility.

In this Standard Practice, all text, notes, annexes, tables, figures, and references are construed to be essential to the understanding of the message of the standard, and are considered normative unless indicated as “supplemental”. All appendices, if included, that appear in this document are construed as “supplemental”. Note that supplemental information does not include mandatory requirements.

U.S. customary units in this Standard Practice are the standard; SI (metric) units are for reference only.

Substantive changes in this 2016 edition are flagged by parallel bars as shown on the margins of this paragraph. The specific detail of these changes may be determined by comparing the material flagged with that in the previous edition.

Non-toleranced dimensions in this Standard Practice are nominal unless otherwise specified.

Excerpts of this Standard Practice may be quoted with permission. Credit lines should read ‘Extracted from MSS SP-124-2016 with permission of the publisher, Manufacturers Standardization Society of the Valve and Fittings Industry’. AMENDMENT FOR MSS SP-124-2016
(Fabricated Tapping Sleeves)

This “normative” amendment applies to MSS SP-124-2016 edition.

NOTE THE FOLLOWING AMENDMENTS:

Page 6, Annex A ( Referenced Standards and Applicable Dates). Amend the existing Annex A with the following specific updates:

MSS; ANSI/MSS

SP-60-20122017 Connecting Flange Joints between Tapping Sleeves and Tapping Valves
SP-96-20112017 Guidelines on Terminology for Valves, and Fittings, and Their Related Components

This Amendment has been inserted into the Standard Practice. For those who obtained the Standard Practice before the April 27, 2017 amendment publication date indicated above or otherwise do not already have this information, please include this Amendment within your existing 2016 edition of the Standard Practice.

Future editions of this Standard Practice will include this amended information.

About MSS

The Manufacturers Standardization Society (MSS) of the Valve and Fittings Industry is a non-profit technical association organized for development and improvement of industry, national and international codes and standards for Valves, Valve Actuators, Valve Modifications, Pipe Fittings, Flanges, Pipe Hangers and Supports, and Associated Seals. Since its establishment in 1924, MSS has been dedicated to developing standards for national and global applications, in cooperation with other standardizing bodies and regulatory authorities.
